

UF | ONLINE

is pleased to host a webinar presented by

VOICETHREAD

February 25, 2014

1:00 - 2:00 pm

Reitz Union Auditorium 2C**

This webinar is designed to highlight the adaptability of this asynchronous learning platform and how it can be used to create dynamic online and hybrid courses.

Topic highlights

- VT's suitability for delivery of interactive lectures, class discussions, student projects, and peer review
- High quality online lectures are easy to create and edit using images, video, music and pdfs
- The VT experience is closer to a face-to-face classroom experience than can be achieved using traditional video lectures and chat boards
- The commenting feature of VT permits dynamic and media-rich interactions between students and their instructors using voice, video, and text.
- The VT mobile app is free and has tremendous capabilities nearly equaling those of the desktop version, giving students and instructors the ability to engage anywhere and at anytime.

** Use the following link to participate from your desktop. Please login a bit before 1 pm. <https://student.gototraining.com/r/6073786151084982016>. You will be "walked" through the processes to install GoToMeeting if it is not installed on your computer and connect to the audio and video. **If you do not have software installation privileges, please contact your IT staff before the meeting date so that they can install the software prior to the webinar.**

Use your microphone and speakers (VoIP) to ask questions. A headset is recommended or you can call in using your telephone. Toll: +1 (215) 383-1020; Access Code: 999-467-737
Audio PIN: Shown after joining the meeting
